

Independent Barriers

From Ferco Seating

Ferco Independent Barriers

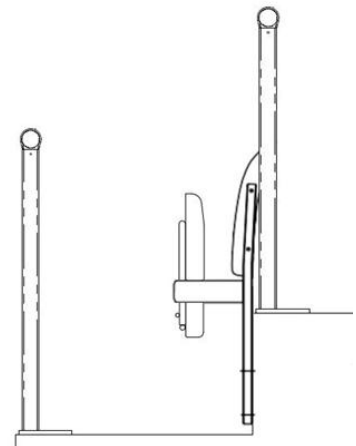

- **Robust independent barriers**
- **For fitting behind existing seats**
- **Compliant with Green Guide specifications**
- **Cost-efficient alternative to rail seats**

DIMENSIONS (mm)

Rail Height (typical):	900
Upright width x depth:	25 x 50
Upright spacing:	Every 2-4 seats

Based on the uprights and rails used in our rail seat range, Ferco's independent barriers are a safe standing solution for clubs wishing to leave existing seats in place.

Extremely robust and designed to be floor-mounted along the front of each seating row, they enable clubs to enhance spectator safety in areas where fans persistently stand and to gain a formal licence for safe standing if fitted in both home and away areas.

ADDITIONAL INFORMATION

- Available for installation by Ferco, or on a supply-only basis
- Steel grade: S235. Galvanised as standard for long-term anti-corrosion protection
- Barrier compliant with Green Guide load resistance specification of 1.5kN/m
- Barrier rail secured by bespoke firm nylon fittings; no metal-on-metal pinch points
- Chamfered side edges as standard on row-end baseplates
- All steel can be optionally powder-coated in your choice of RAL colour (but we recommend the galvanised finish)
